

Portland to Milwaukie Light rail Tillamook Branch

CP is providing construction staking survey for the 6 Span Light rail bridge and up to 3000' retaining walls.

Tri-Met MAX Light Rail Improvement Project, Portland Oregon

For this design/build project, CP provided Design Manager to coordinate civil and system/electrical design. CP was fully in charge of the survey and civil element design including rail alignment as built research, field topo and track alignment survey, track alignment and profile, special trackwork, rail switch heater box, drainage, demolition and restoration design, quantity estimate and specification preparation.

Boundary and Subdivision Survey, Portland Oregon

CP provided boundary, subdivision, building envelope staking, site grading staking and utility staking, as-built survey for many individuals, companies, developers, builders and contractors.

University of Washington Bothell Campus Expansion, Bothell, Washington

CP is providing construction staking survey QC for the campus expansion.
